On-demand skills training and university credentials for the 21st century

In today's fast-changing world, you need a convenient and affordable way to gain new skills and credentials quickly—so you can do more, be more, and take your career to the next level.

Whether you want to learn new skills or simply get credentialed for skills you already have, learning apps and credentials from the **University Learning Store** give you a competitive advantage at every stage of your career, from entry-level employee to experienced executive.

Join us for a limited-time open beta

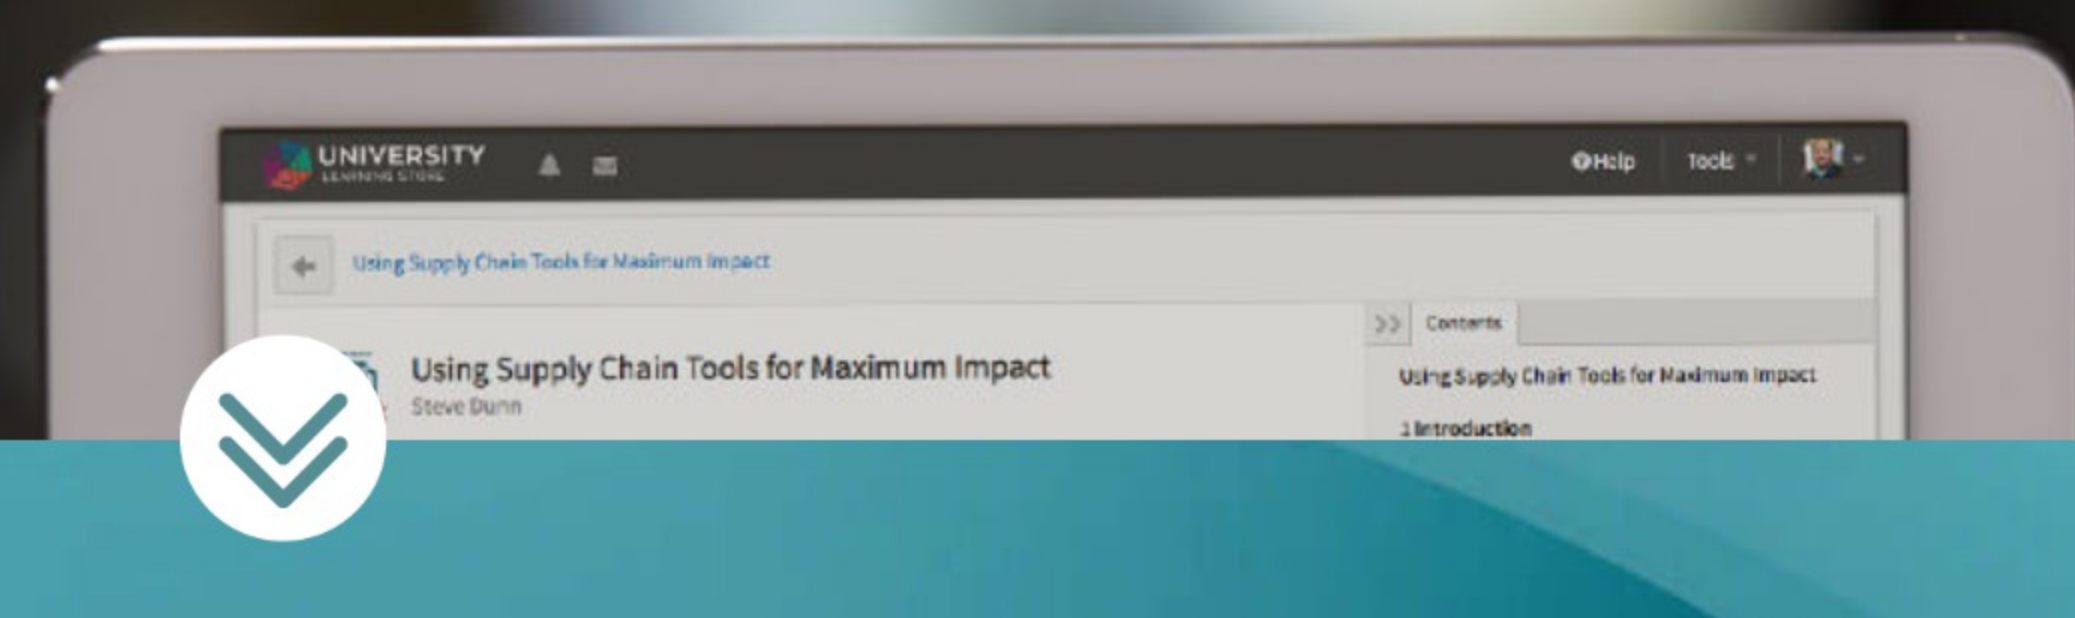

As we continue to build the University Learning Store, we'd like your feedback. For a limited time, we invite you to enjoy select learning apps for free. What new skills or features would you like to see? Try us and let us know by completing [this short survey](#).

Authentic assessments prove your knowledge

To earn a credential, you will demonstrate your knowledge by passing assessments. Many of these will be hands-on, skills-based projects that resemble real-world business scenarios. All credentials have been verified by employers to ensure they are representative of the competencies (skills and knowledge) required in today's workplaces.

Pass a badge assessment to earn a **micro-credential**. When you pass all of the learning apps and badge assessments in a skills track, you earn a **certification** that carries the name of the issuing institution.

University Learning Store learning apps and credentials are:

RESPECTED

Learning apps and credentials are developed and granted by world-renowned universities.

VERIFIED

University Learning Store learning apps and badge assessments have been verified according to employer and industry demand.

FAST

Most credentials can be earned in just a few days or weeks. Start anytime and learn what you need, when you need it.

CONVENIENT

Earn a credential online, anytime, from nearly any device.

Learning apps and credentials in the Learning Store are organized into three categories:

Power skills include competencies in communication, teamwork and collaboration, critical thinking, problem solving, and more.

Technical skills include industry-specific, and in some cases, job-specific skills in information technology, business, agriculture, health care, sustainability, and more. Learning apps and badge assessments in this category are **coming soon!**

Career advancement skills include topics such as leadership, public speaking, management, and negotiation.
